All students are going to need an e-mail address. If you can not do this at home go to the Public Library to set up a free <sup>e-mail</sup> account at gmail.com. You can check e-mails at the library. You need an e-mail address just for school. (or other service provider)

**note** Parents can add their own name between the child's first name and the 227 in the address if they worry that their child is not yet 13 years old and they want their own name as part of the address.

our goal is to make sure we have a working e-mail address which can be included in our class data base.
