

insect structures

insects build places to live and reproduce

examine the insect structures

on our  web site

Our goal is to examine structures made by insects and to make generalizations from those observations.

Sally

drawings of the insect structure	
What do we know about the insects that built these structures?	think and search question

Things to think about:
How do the insects act in and out of the structures?
Describe textures and smells

compare and contrast

What do these insect structures have in <u>common</u> ?	How do they <u>differ</u> ?
Think and search questions	

Pick one structure - examine it	structure
What insect body parts were used in the construction?	insect
How do you know?	

What does the structure provide for the animal?	What (insect) stage of life built this structure?
In my head question	In my head question
