

insect behavior

name _____ Class _____ team _____
 data _____ date _____ seat _____

We will find out about the insect behavior experiments done by Jean Henri Fabre on Great Peacock Moths.

You will make a poster (concept map) of his experiments.

Our goal is to examine the writing/journal of a scientist to see if we can understand his experiments

What were his questions?	What were the experiments?	What was the data that he collected?	What conclusions did he come to?
While reading about and discussing Fabre's work it is important that you answer these questions			

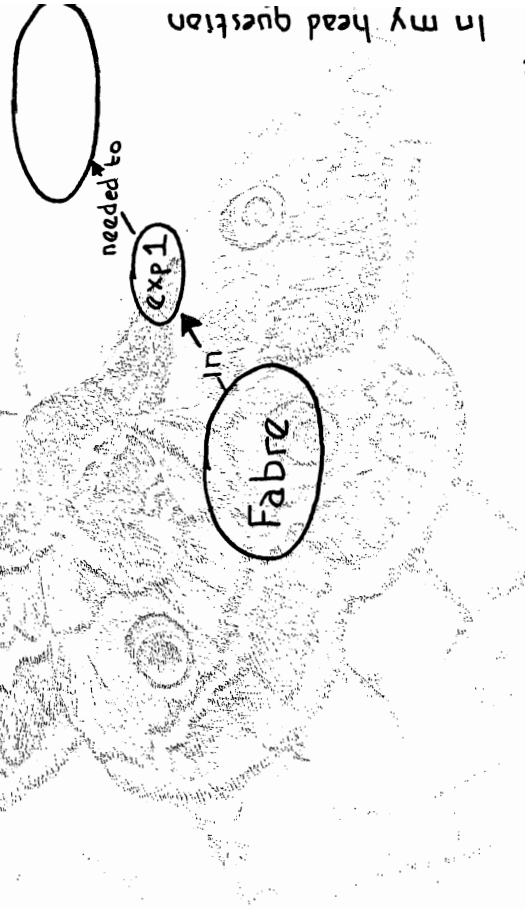

These are think and search questions

Jean Henri Fabre's writings are on our  web site

What were Fabre's Variables?

What did you discover about the behavior of Great Peacock Moths?

Notes for your concept map: this map should be written out in full sentences. ex. Fabre, in experiment 1, needed to...

sally

You will make a concept map here
