Reduce, recycle and reuse  
garbage

read pp 22-23 of your workbook

In New York City we have filled up all of our garbage dumps (landfills). When we put our trash out on the curb it vanishes. Where does our garbage go?

What problems will arise if we continue to throw away things at our current rate?

What part does paper play in this global picture of trash?

What can we do to reduce our "pile" of trash?
