

# my piece of the neighborhood

sally 4

This project involves observing something over a long period of time. You grow, but do not notice it happening. You see yourself in the mirror every day. Pick a spot/area outside your house that you can go to every month. The area needs to have plants and soil.

You will go to your site every month. You will collect data at your site, that you will enter into your "Sally" notebook. Collected data will include the date, time, temperature, weather and cloud cover.

\_\_\_\_\_ data

### Parent part

I understand that my child has to make a journal entry into this book every month after going to their study site. I will help my child accomplish this task.
