weather watch

Temperature Conversion

To convert from F° to C°:
Subtract 32° and then multiply by 5. Divide the result by 9.
For a quick estimate of Centigrade:
Deduct 30 and divide by 2.
To convert from C° to F°:
Multiply by 9. Divide the result by 5. Then add 32.
For a quick estimate of Fahrenheit:
Multiply by 2 and add 30.

°Fahrenheit		°Centigrade
212	water boils	100
194		90
176		80
158		70
140		60
136	highest Earth temperature ever recorded	57.7
122		50
104		40
98.6	body temperature	37
86		30
68		20
50		10
32	water freezes	0
14		−10
−4		−20
−22		−30
−40		−40
−58		−50
−76		−60
−94		−70
−112		−80
−129	coldest Earth temperature ever recorded	−89
−130		−90
