1.) How does this movie relate to our *My Piece of the Neighborhood* project?

2.) How does fungus and bacteria in the soil benefit us?

3.) Why do you think your Science teachers want you to see *DIRT*?

4.) Why is the city of Los Angeles spending so much money bringing in water from other states? How could they do this differently?

5.) Choose one culture presented in the film and describe their relationship with DIRT.

6.) What is in DIRT that allows plants to grow?

7.) What can you and your family do to make sure dirt is taken care around your home?

8.) What has this film taught you that will change your behavior?
