

# What to look for in a daily summary

## Meets Standard

page  
no. 012303

Today in Science we did our first experiment on fingerprints. We learned how to properly make a fingerprint. You have to take one end of your finger and roll it to the other side of your (top of) finger. I also learned that a pattern is something designed or shaped to serve as a guide in making something else. We also learned that a penny is engraved so when you dip the penny in black ink then when you press it on paper you only see the circle and a little bit of the penny's head. A fingerprint is a sign of identification.

This summary is long enough to tell the entire story

# Approaches Standard

Sept. 29, 03

Today we finished Experiment #2. We also began working on experiment #3. We did not get to finish experiment #3. We also had a fire drill which took up some time and made a decision about who would call people to remind them about getting signatures in our experiment booklet.

Sept. 30, 03

Today in class, we did the following. We did experiment #3 and during this, we learned about the different prints of a finger. We used finger prints, like this  and we matched them to others.

Oct. 1, 03

Today in class we did not have Mr. Grambo. We did a worksheet about fingerprints and we had to read and write a paragraph. The paragraph was about how fingerprints can be

## Below Standard

9/18/03 5  
We glued papers in our book.

9/22/03  
We wrote out our envelopes.

9/23/03  
We took papers and glued them in. We put our envelopes in 4 piles.

9/24/03  
We went to table 2. We got experiments at the end of class.

9/25/03  
We got to do experiment number 1. We put a penny on a stop pad.

9/30/03  
We glued finger prints while trying to match them. For experiment 3.

10/17/03  
We talked about the Cyber Quest and how to
